GRE Subject Test Preparation

Module Summary:

Demonstrate your undergraduate subject-matter knowledge in areas such as mathematics, physics, or psychology with the GRE Subject Test. This module provides in-depth preparation strategies and resources for these specialized tests.

GRE Subject Test Overview

Introduction to GRE Subject Tests

The GRE Subject Tests are supplementary tests that are designed to evaluate applicants' readiness for postgraduate study in specific fields, including Chemistry, Mathematics, Physics, and Psychology. Each test assesses topics taught in undergraduate programs that are necessary for specific disciplines in the graduate study. The test is intended for students who have an extensive background in the particular subject and wish to showcase their expertise to graduate and business schools.

Test Content and Structure

Beginning in September 2023, the GRE Subject Tests will be administered in a computer-delivered format. Total testing time is 2 hours and 50 minutes for the Mathematics Test and 2 hours for the Physics and Psychology Tests. There are no separately timed sections. Each test covers a wide range of topics and is designed to gauge the candidate's in-depth understanding of the subject.

Use Cases and Applications

Many graduate programs require scores from the GRE General Test as part of a complete application, and some also require or recommend scores from one or more GRE Subject Tests. The scores obtained from these tests are used by thousands of graduate and business schools to make admission and fellowship decisions. They are especially useful for showcasing expertise in specific fields such as Chemistry, Mathematics, Physics, and Psychology.

Scoring and Validity

For all Subject Tests, candidates earn one point for each question answered correctly and lose $\frac{1}{4}$ of a point for each question answered incorrectly. This raw score is then converted to a scaled score between 200 and 990. The GRE Subject Test scores are valid for five years after the exam date, similar to general GRE scores.
